Extracts from Inspector General's Survey of the Office of Basic and Geographic Intelligence, dated March 1970

SUMMARY section, page 2, paragraph 6

6. The principal problem of the Map Library Division pertains to its physical location and isolation. We have no recommendation to make on this point.

MAP LIBRARY DIVISION section, pages 61-63, paragraphs 15 and 16

15. The location of the Map Library has had an adverse affect on the morale of its employees and management. Since July 1963 the Library has been housed in the annex of a 50-year old building in the

is served by a 50-year old, hand-operated freight elevator that frequently is out of service for repairs. When it is inoperable, employees (one of whom is crippled) must climb and descend the equivalent of four flights of poorly lighted stairs. A dreary cafeteria is located on the second floor of the main building.

16. On several occasions we witnessed hard drinking taking place in automobiles parked in the vicinity of the [REDACTED] and along routes that our employees would have to take between the office and their automobiles, as early as ten o'clock in the morning and as late as three o'clock in the afternoon. Some of our employees are reluctant to go as far as NPIC for lunch. The contrast between this environment and that which exists for Agency employees in the headquarters, Rosslyn and [REDACTED] office areas, and the contrast with the amenities available to NPIC employees two blocks away, has not been lost on the employees of the Map Library. For the Library's 31 white and 10 black employees, it represents a serious morale problem, though the latter find the location somewhat more convenient because of the proximity to their homes.
